

## **Computer Automation Systems, Inc. releases SEAS™ Assessment Report Manager module**

Creates and manages evaluation assessments, saving school psychologists, speech/language pathologists, and others over two hours per report

Mountain Home, AR – April 13, 2006 – Today, Computer Automation Systems, Inc. announced that the Assessment Report Manager module of the industry-leading SEAS™ special education management system has been released and is immediately available.

The web-based Assessment Report Manager provides an indispensable tool for psychometric examiners by stream-lining the process of scoring, integrating scores into reports, and communicating results through the most effective visual presentation possible. Users will no longer spend valuable time on clerical level tasks such as formatting reports and graphing test results. This saves time while simultaneously enhancing the overall quality and value of evaluation reports. The solution currently offers nearly 200 psychometric and other instruments to create downloadable and customizable reports. In addition, Assessment Report Manager helps districts stay in compliance of state and federal laws by dynamically providing legal guidance to examiners during the report writing process. This enables administrators to enforce accountability across their staff.

“The Assessment Report Manager is another vital tool that allows educators to manage their entire special needs program,” said Darren Johnson, Director of State Solutions. “In addition to the comprehensive assessment instruments, the real advantage to the districts is the mandated compliance components that the system automatically generates. With so many compliance points and issues, we felt it was necessary to bring this solution to our customers.”

A 100 percent Web-based software product, SEAS is designed to provide ease-of-use for teachers, while delivering the functionality needed to easily manage special education forms and reports tied to state-standard curriculum, related services tracking, reporting and analysis, and Medicaid billing.

SEAS customers and prospective customers can receive demonstration, implementation, and pricing information by calling Computer Automation Systems, Inc. at (877) 221-7327 (toll-free)
