

## **Computer Automation Systems announces release of the newest development of SEAS™ University**

*Nation's leading special education plan management company launches exciting enhancements to its online learning portal, SEAS™ University.*

**Mountain Home, AR – June 22, 2009** –Computer Automation Systems (CAS), the nation's leading special education plan management software company announced today the upcoming release of the latest development to its online learning portal, SEAS™ University.

SEAS™ University was first launched in 2008 as a fully accessible online training delivery portal. SEAS™ University delivered self-paced lessons and live webinars on the SEAS family of products, and quickly became a hit with customers. Seeing the potential, Darren Johnson, CAS' Service Director, began envisioning the next phase of online learning and education content delivery. "We had a very positive response from customers, but we immediately began receiving requests to deliver state and district specific content, along with content from education industry experts. Realizing the impact we could make in the education world, we quickly began design of the next phase of SEAS™ University."

CAS Service employees have since designed and recorded many state-specific lessons ranging in topics from understanding forms to completing necessary data for state reporting. CAS has also been in contact with several interested school districts to begin recording and editing district-specific training lessons on processes and procedures. Johnson also designed an e-commerce site where anyone can purchase lessons on education hot topics such as IDEA, 504, and Response to Intervention, delivered by industry experts, at any time.

"We had to do this," continued Johnson, "we knew we could make a great impact in education if we could just design the platform to deliver pertinent education-related content anytime, anywhere. This really is the wave of the future."

The first release of the enhanced SEAS™ University is scheduled for August 2009. Information about the product availability, pricing, and demonstrations can be found on the company's website at <http://www.computerautomation.com/products/seasap> or by calling toll-free 877-221-7327.

### ***About Computer Automation Systems Inc.***

A K12 PLAN MANAGEMENT COMPANY

Computer Automation Systems (<http://www.computerautomation.com>) is passionate about helping K-12 educators meet the individual needs of students. Since 1996, its special education plan management line of products (SEAS™) has helped more than 2,000 school districts in 36 states and Puerto Rico reduce paperwork, improve compliance, increase efficiency and demonstrate accountability. That experience in Special Education and IEP Management allows us to now help districts with any student performance plans. It is this plan management expertise, coupled with exceptional customer service which permits Computer Automation Systems to retain over 99 percent of its customers while allowing schools to leverage data to improve student performance.
