

SEAS™ voted best special education management system

Nationwide survey of end-users selects SEAS over all other special education management systems

Mountain Home , AR – January 4, 2006 – In its January edition, education industry publication eSchool News announced the results of its K-12 reader survey of the best school management solutions. SEAS, developed by Computer Automation Systems, Inc., was the readers' choice for “best special education management system.”

SEAS is a 100 percent Web-based system designed to reduce paperwork and administration time for teachers, while delivering easy-to-use functionality needed to easily manage IEPs and forms tied to state curriculum standards, related services tracking, reporting, analysis, and Medicaid billing.

eSchool News readers specifically commended Computer Automation's “awesome” customer support as well as its advanced web-based technology which allows system access from any Internet connection and focus on reducing paperwork for teachers and administrators.

“Over the last ten years, we have tried to focus our efforts on solving customer problems with SEAS while delivering outstanding customer service,” said Darren Johnson, Director of Marketing and Strategic Alliances. “We are very flattered and honored to receive this award. That our customers would take the time out of their busy schedules to vote for SEAS lets us know that we're delivering what school districts need.”

About eSchool News

eSchool News is a monthly print newspaper providing the news and information necessary to help K-20 decision makers successfully use technology and the Internet to transform North America 's schools and colleges and achieve educational goals.

The print newspaper is read by more than 180,000 school leaders, and a companion web site -- eSchool News Online (www.eschoolnews.com) -- is visited by more than 200,000 unique visitors each month, including 65,000 registered members.

eSchool News covers education technology in all its aspects--from legislation and litigation, to case studies, to purchasing practices and new products. Together the newspaper and the web site serve an unduplicated audience of more than 340,000 executive educators.

About Computer Automation Systems, Inc.

In only ten years, Computer Automation Systems, Inc. has become the nation's leader in providing special education management software solutions. Today, the company's SEAS™ product line manages the special needs programs of over 1,500 K-12 school districts. Committed to the on-going success of their customers, Computer Automation combines the high-performance web-based SEAS solution – designed to manage compliance, administration, and reporting in an easy-to-use, district-customized format – with a focus on long-term customer relationships. The SEAS solution has been embraced by remote, rural school districts with less than ten (10) special education students to large urban districts with thousands. Computer Automation's headquarters are in Mountain Home , Arkansas.
